Good Seed Corn Scarce

The situation on Seed Corn is becoming more serious every day as tests are made showing the germination on a great deal of corn that was intended for seed is far below normal. Supplies of many varieties are limited; some completely exhausted.

We still have a very good selection of the early and medium early varieties which we offer subject our stock being unsold, our germination 85 to 90%. Our Ensilage varieties are exceptionally good value.

Order now while stocks of good quality are available.

Also wish to call your attention to quotation on Spring Rye, Six-Row Barley and other Seed Grains, quoted at reasonable prices quality considered.
